SKILLS

- ❖ Java, Python, JavaScript
- ❖ HTML, CSS, Node.js, Express.js, React.js
- ❖ MySQL, MongoDB, Git, GitHub

EDUCATION

- ❖ Computer Science Engineering | University of Lucknow, Lucknow CGPA: 9.0 | (Sep '24 – Jun '28)
- ❖ XII (CBSE) | Vanita Public School, Varanasi 92.2% | 2024

PROJECTS

- ❖ **Smart-Money – Personal Finance Management System** [Project link](#)
 - Built a browser-based finance tracking application using HTML5, CSS3, and JavaScript.
 - Enabled users to add, view, and manage income and expense transactions dynamically.
 - Implemented automatic calculation of balance, total income, and expenses using DOM manipulation.
- ❖ **Triwizardathon – Interactive Themed Quiz Web App** [Project link](#)
 - Designed and built a Harry Potter-inspired quiz game with HTML5, CSS3, and JavaScript, incorporating audio, animations, and responsive UI.
 - Implemented dynamic question logic, real-time answer validation, timers, and certificate generation upon completion.
 - Enhanced user experience with interactive sound controls, visual effects, and modular front-end code organization.
- ❖ **ExploreVibes – Smart Way to Explore, an Interactive Discovery Web App** [Project link](#)
 - Developed a responsive front-end application using HTML5, CSS3, and JavaScript to present curated experiences, destinations, or “vibes” to users.
 - Implemented dynamic UI updates, interactive filters, and smooth navigation for enhanced exploration.
 - Focused on accessibility and performance to ensure a seamless user experience across devices.

ACHIEVEMENTS

- Selected among the Top 50 teams in SIH internal rounds for developing a Face Recognition–based Attendance System using Python, Flask, Pandas, and supporting Python modules.
- Awarded the Genpact STEM for Her Scholarship, gaining access to industry mentorship, skill-building sessions, and professional development support.

CERTIFICATIONS & TRAININGS
